

## REMARKS

Applicant respectfully requests entry of the present amendments which generally conform the claims to U.S. practice.

With respect to the claims, Applicant requests that any amendments made during the International Phase of the corresponding PCT application not be entered in this U.S. National Stage filing. Instead, Applicant requests entry of the present amendments under 37 C.F.R. §§1.115 & 1.121, which are based upon the claims as originally filed in the International Phase of the PCT application. Herein, claims 1-77 are cancelled and claims 78-100 are newly added in order to conform the claim set to U.S. practice and standards.

No new matter is being introduced by this amendment as antecedent support is set forth in the originally filed application. These amendments are not made for purposes of patentability, but instead simply to present the claims in clear form for examination. Particularly, present claims 77-100 generally correspond to original claims 55-77 and differ in that multiple dependencies are herein removed.

Prosecution on the merits is respectfully requested.

If there are any charges with respect to this Amendment or otherwise, please charge them to Deposit Account No. 06-1130 maintained by Applicant's attorneys.

Respectfully submitted,
